Enhanced Vision has been an enormous benefit to me. I have macular degeneration. Enhanced Vision enables me to read my mail, check bank statements, etc. Without it, I would be unable to function. I am so thankful that I have my "Enhanced Vision." It has improved my life - since I now live alone and want to stay in my home, I need all the help I can get!

Enhanced Vision provides that help - I wish my eyes were better, but at least I can get by with my Enhanced Vision. I never realized I was a person with a disability, but with Enhanced Vision I can somewhat manage my disability -

Sincerely,

Dorothy Strobel
