

When I learned that my eighty-eight year ^{//} old husband could no longer manage our household,

I knew that I had to take over the job.

I managed our business for three years...»

and then ...I learned that I had macula in both eyes. I called your main office and I was happy to welcome Sloan Morris and his assistant, both great teachers, and a new Merlin to my home.

Our lives were back to normal. When I need help, I call Sloan. He has taught me how to flip the light switch and how to push the surger button.

I praise my "eye machine" every chance I get.
